

GITL has been awarded the National Champion & Regional Champion under “Operation Cleansweep” by Microsoft

While working passionately towards getting new customers, it's our existing customers who too hold the key to our success. Especially during these times of economic downturn our existing customer base merits even more attention.

“Operation Cleansweep” is all about exploring and engaging deeper with our existing customers. This award is a recognition given to the winner for maximizing value from existing Microsoft Dynamics customers.

We give all our credit for this award to our existing customers as well as our talented and very dynamic team of Microsoft for achieving this goal.
