AN EXTERNAL INTERFACE THAT SAVED
DUPLICATION OF EFFORTS

WALK THE EXTRA MILE

A GLOBAL ORGANIZATION COMMITTED TO WILD LIFE AND NATURE CONSERVATION

The client is the Indian wing of an international organization that is on a mission of environmental protection. It has an autonomous office, with the Secretariat based in New Delhi and various State, Divisional and Project offices spread across India. It is the largest organization engaged in wildlife and nature conservation in the country.

FOR A LIVING PLANET

The Challenge

The client was using Microsoft Dynamics AX 2009 for their Accounting and Inventory Management in India. However, there was a separate validation software that was controlled and handled by the organization headquarters in Switzerland. This was leading to increase in time and effort and a higher percentage of manual errors due to the process of duplicating entries between the two systems.

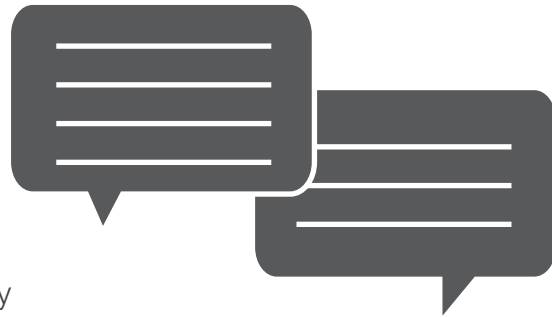

The Solution

The task was initially on hold due to the research and development needed to find the ideal solution for this scenario. Our consultants were assigned this complex interfacing requirement and successfully completed the task in less than the expected time and the client really appreciated this. The integration between the two systems now helps the users to directly validate transactions from AX 2009 without any re-entry in the validation software.
