

LS Central

LS CENTRAL

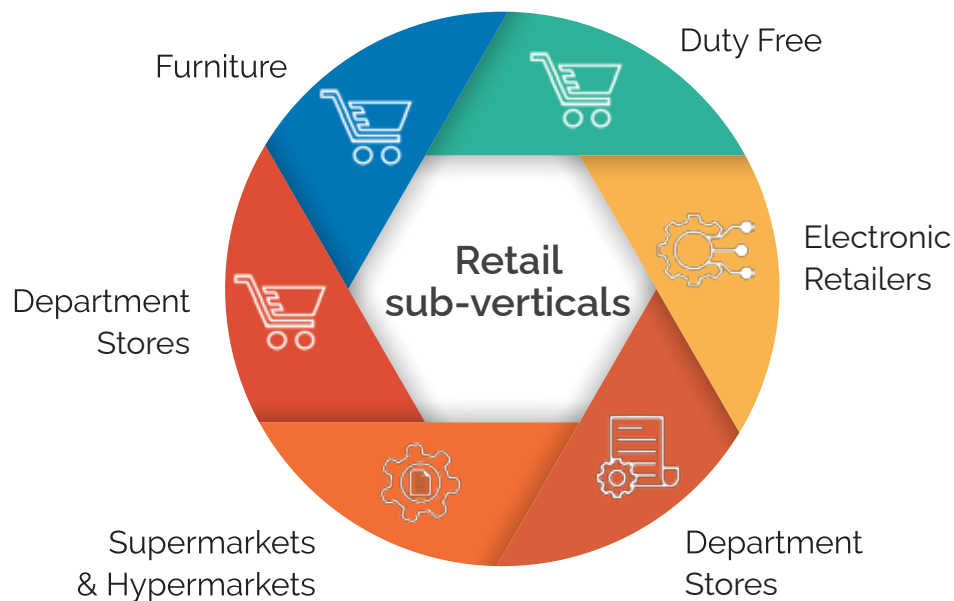

Unified Commerce
Platform For Retail
and Hospitality

Introduction

LS Central is a complete unified commerce platform that is built on Microsoft Dynamics 365 Business Central, powered by Azure. Available in cloud, on-premise or hybrid options, it has taken the retail & hospitality industry to the next level by providing digital tools powered by Artificial Intelligence (AI) and Machine Learning (ML) technologies.

Retail Verticals

Hospitality sub-verticals

Dining & Takeaway

Quick Service Restaurants

Hotels & Resorts

Our LS Central Service Offering

Business Consulting

Comprehensive business consulting services for process re-engineering, digital transformation and legacy application modernization.

Implementation & Global Rollout

Complete software development lifecycle right from requirements, design, development, user accepting testing, go-live and roll-out to multiple locations.

Migration & Upgrade

Migrate/ upgrade from older versions of LS NAV to the new cloud-based solution with regular updates being provided by LS Retail.

Managed Support Services

Post implementation, Customers have the choice of opting for dedicated or shared support services with multiple Service Level Agreement (SLA) based plans as per user needs.

Customization

Not one size fits all. For organizations that have unique requirements, our team of experts will provide customized solutions with options to modify UI, add functional extensions, build impressive apps, and cater to industry specific requirements.

Integration

We offer data and application level integration with other third-party services that may already be part of an organization's IT ecosystem.

Licensing

In addition to our services, we also provide LS Central on-premise (perpetual) and cloud (SaaS) subscription license plans.

Customer Story

LS Central implementation along with NAV to Business Central Upgrade

About the Customer

Saudi Arabia's Leading Trading Company specializing in the Capital Goods Sector

Business Case

The Customer was using two different systems - NAV 2017 and Oracle Retail Pro (POS), due to which the same information was being captured at multiple points.

Business Solution

- ◀ Automated material requisition planning (MRP)
- ◀ Implementation of standard LS Replenishment module
- ◀ Cash & bank management

Benefits

- ◀ All day to day transactions are being done on the BC-LS system with no manual interventions
- ◀ Due to the success of the current engagement, Customer has selected GITL for providing AMC support and software licenses for all 56 stores

Improved Customer Experience with NAV 2017 & LS Retail Implementation

About the Customer

Large Retailer in Mauritius dealing in home appliances, digital products and furniture

Business Case

The Customer needed an integrated solution for the Retail POS, Back Office, Warehouse & Credit Application functions

Business Solution

- ◀ NAV 2017 & LS Retail 10.0 for Retail POS, mobile inventory & LS loyalty management functions
- ◀ Advanced warehouse management with barcode & handheld device enabled product receipt and shipment

Benefits

- ◀ Better customer experience with end-to-end visibility of orders from booking to delivery
- ◀ Inventory count performed in the stores using the LS Omni Mobile Application

Hear From Our Customers

On behalf of our entire organization, I wish to express my sincere gratitude to the team from Godrej Infotech Ltd. for the work done on VAT Transition project. All activities such as database analysis, VAT configuration on both Head office and Store, open transaction updates, report modification, functional testing, training, customer testing and post go live support have been completed on time & with good quality. This project has been done remotely due to the COVID-19 situation, and we are happy to mention that all collaboration was efficiently managed by the team from Godrej Infotech.

Leading Seafood Restaurant in Saudi Arabia Successfully Completes VAT Transition

System Application Manager

The NAV LS Retail Software has helped our organization significantly. Earlier our organization was facing issues with regards to data replication between our multiple stores and HO. With the ERP solution in place, there is a single database which stores all our master and transaction data.

We would like to thank Godrej Infotech for their commitment and dedication throughout the project and wish them all the best for their future endeavors.
