

ENGAGEMENT CASE STUDY

Customer Background

The organization is one of the largest industrial companies in the capital goods sector with 12 brands, 64 manufacturing plants & 48 R&D centers. It has presence in more than 190 countries, with a workforce of more than 71,000 people. In India, it specializes in agriculture equipment, construction & financial services.

Business Case

The organization was facing many challenges with regards to the existing legacy software system. The objectives for the new implementation were as follows:

- Common business processes across locations
- Uniform master data
- Minimize existing 500+ customizations
- Alignment with latest software release

Highlights

Industry: Manufacturing & Distribution

Project Location: India

Engagement Since: 2017

Solution Snapshot:

- Number of users: 800+
- Single click data migration from Baan IVc4 to Infor 10.4
- Compliance to India localization
- Zero "Source Code" customization
- Common business model at core location for roll-out across other units

Global Leader in Capital Goods Successfully Implements Infor LN 10.4 in India

Business Solution

The solution offered by Godrej Infotech involved the implementation of Infor LN 10.4 at the organization's manufacturing units at Noida & Pune in India with the Sales, Planning, Procurement, Warehouse, Manufacturing, Service & Finance modules.

Multiple interfaces have been developed for integration of ERP LN with third party systems for better transparency.

Following enhancements have been implemented:

- EDM (Engineering Data Management)
- Direct Deliveries
- Plant Maintenance
- Service
- Infor OS – Alerts & Workflows
- Infor Warehouse Mobility
- EDW – Global interface with parts data warehouse
- WPS – Interface with purchase contracts system
- CSPPS (Common Spare Parts System) – Interface for forecasting & planning functions

Challenges

- Lack of integrated system resulted in uncoordinated Engineering, Production, Sales & Purchase processes
- Difficulty in tracking of Engine and Tractor number on assembly line as per VIN (Vehicle Identification Number) standard

Benefits

- Increase in process efficiency due to automation of process flow
- Better control on inventory and processes
- Integration with other software ensures fairness and transparency
