

Case Study

Customer Background

Established in 2013, the client is an international manufacturer of industrial molds used for casting, extrusion, and refinement processes. In addition to molds, the organization also manufactures solar panels. Their trademark products are perceived to be the most operating-friendly and cost effective materials for solar cell glass encapsulation. The company caters to the needs of both the domestic and international markets, with an annual production capacity of close to 4,000 MT.

Business Case

Being a newly established organization, the client's goal was to follow industry standard best practices for their discrete and process manufacturing operations. The requirement was to create a unified platform that could handle the finance, HR, production, warehouse, sales and marketing processes. Accurate reporting was a crucial requirement for the client, which justified the need for an integrated system that could act as the single source of data across locations and business functions.

KSA's Leading Plastic Mold & Solar EVA Film Manufacturer Goes Live with Microsoft Dynamics AX and Saudi Payroll Add-On

Highlights

Industry: Manufacturing

Project Location: Kingdom of Saudi Arabia

Engagement Since: 2014

Solution Snapshot:

- Rapid Implementation with all Standard AX Processes Included
- Centralized Server Deployment
- Multiple Offices and Warehouses
- 2 Legal Entities
- 16 Dynamics AX Users

Modules:

- Finance & Budgeting
- Accounts Receivable & Payable
- Procurement & Sourcing
- Inventory & Warehouse Management
- Production Control (Discrete & Process Manufacturing)
- Sales & Marketing
- Human Resource
- KSA Payroll Add-on Solution

Business Solution

Godrej Infotech Limited was selected as the preferred implementation partner for this engagement, due to its successful track record of providing Microsoft Dynamics AX ERP solutions for the manufacturing industry. The solution provided by GITL includes the following features:

- Single integrated software system for operational and finance functions.
- System for tracking of production and batch orders.
- KSA AX add-on solution to address Payroll requirements.
- Standardization of system usage across locations.
- Required MIS and operational reports.

Challenges

The issues with regards to a new implementation were primarily related to user education and training. Godrej Infotech Limited ensured that end users were educated by the best practices offered by AX. The GITL team worked together with the client team to help them adapt to the AX processes. Training was provided to users before and after Go Live to empower users for handling day-to-day transactions. Training was also provided to the Finance team on the Management Reporter feature for generating accurate finance reports.

Benefits

The key benefits received by the client from this Microsoft Dynamics AX 2012 implementation are:

- Reduction in time spent on duplicate entries.
- Significant increase in business efficiency and employee productivity.
- Complete payroll processing in Microsoft Dynamics AX.
- Tracking of production and batch orders.
- Optimal resource planning.
- Tracking and accounting of inventory.
- Easy to generate MIS Reports.
